## ANNOUNCEMENT.

### For Senator.

We are authorized to announce Judge James T. McCreary, of Sharpshooter, a candidate for Senator, subject to the action of the Republican party.

THURSDAY, MAY 18, 1899.

The surrender of the Philippines is becoming an old story.

It will soon be a feature of the news reports to mention the few remaining great business interests that haven't gone into a trust.

Poor Dewey! The East and the West are pulling and hauling for the privilege of handing him when he comes home. When the country gets through with its welcomer there won't be enough left of him to stand alone.

The idea occurred simultaneously to some hundreds of paragraphers that President McKinley was in hot water again when the dispatches announced that he had gone to the Virginia Hot Springs to take the baths for his health.

The Democratic aspirants for the gubernatorial nomination seem to get more "hot up" as the weather gets warmer. Poor Wat Hardin is being badly whipsawed, both Stone and Goshel giving it to him, while the latter are very considerate towards each other. The man that can pick the winner must be well skilled in judging political matters.

The West is clamoring for Admiral Dewey to return home by way of San Francisco and make the trip across the continent by the finest special train procurable. Of course the East wants the first pass at him. If the Admiral is well-advised he will come by flying machine and soar around out of reach until the novelty of his return wears off.

The United Confederate Veterans will hold their next year's national reunion at Louisville, Tenn., being a central point, the reunion is likely to be the biggest in point of attendance ever held, and in the lavish manner in which the entertainers of old Confederates from Kentucky and adjoining States who have never yet attended a national reunion will likely be on hand.

Mrs. Anna E. George, recently acquitted at Canton, Ohio, of the charge of killing her alleged betrayer, George Saxton, delivered her first lecture to an audience of 25, only 14 of whom paid admission, at Steubenville, Ohio, last week, so the dispatches say. Public sentiment, but not the law, acquitted Mrs. George, though it seems that the same public sentiment doesn't approve of her taking to the lecture platform. In a big city she might have crowded houses.

The distribution of the \$3,000,000 to the Cuban army has struck a snag. Gomez was suspected of playing politics about it, since the Cuban officers are selected to help distribute it refused to act, but the informed Gen. Brooke that a party of officers had formed to make trouble over the distribution and disbandment of the army, which had so disgusted him that he wished to wash his hands of the whole business and would not further cooperate with him in the matter. Forcible disbandment may be tried by Brooke, and then there'll be a hot time.

Brother expansion became the fad in this land of sympathy for all patriots struggling for freedom and political independence. Oom Paul Kruger, the "grand old man" of the Transvaal republic, was applauded for his heroic stand for the rights of his bantam nation, but now when he is arming for a death struggle against British imperialism our American expansionists look coldly on, without a cheering word for the sturdy old freedom-loving Dutchman. If Oom Paul had sufficient might he would be powerfully right, from the expansionist point of view.

There are the passion of the day. The impulse seems world wide. The expansion sentiment of the United States, Great Britain, Germany, Russia and France are mostly the political expression of the trust passion.

Dewey expects to return home across the Atlantic about the latter part of September. His name portions of the world he is to go through probably somewhat like those of a man who is going to be married to the lover of his choice—a mixture of dread and delight.

Mr. Ed.: (1) Why is it that silver does not go to the mint the same as gold? (2) Why is it that Germany, Italy, Belgium, England and all foreign powers stand out against silver? (3) Was there more money per capita when silver was worth 3 per cent?

(1) For the same reason that copper or nickel doesn't—the law doesn't permit it. (2) Principal reason is because it is practically impossible to have two standards of money in use at the same time, and gold for divers reasons is preferred to silver for a monetary standard. (3) Suppose you allude to the period between the issuance of greenbacks and 1873 when silver was at a premium in gold. If so, our need for it that it was and is. The U. S. silver coins then were nearly exclusively small change and comparatively insignificant in amount. Since the so-called demonetization of silver the per capita has averaged much larger than ever before.—Ed.
